THE COLOR BLUE - Cont'd

Blue is the color that corresponds to the 5th chakra. The musical note of blue is G, a favorite key for the composer of romantic music.

The Russian artist Kadinsky captured the expansive essence of blue when he wrote that blue is "the infinite penetration into the absolute essence - where there is, and can be, no end." People who are strongly attracted to blue tend to be devoted and deliberate in their actions and since blue is everywhere, they feel a unity with the world.

Finally....My color!!

Blue is "it" for me. I see everything with a blue hue. I wear something blue daily, my eyes are blue, Father Sky is blue, Robin's eggs are blue, Colorado Blue Spruce is my favorite tree, I could go on.....<g>
